Cryptocurrency Wallet Disclaimer

As of: 20 March 2023

A purpose of cryptocurrency is to allow people to manage their funds (cryptocurrency) and non-fungible tokens (NFTs), collectively, your digital assets, in an anonymous and secure way, from any location, without relying on third parties such as banks.

On the blockchain, your digital assets are not controlled by any bank or government.

You are the only one who has access to your funds and NFTs, and you can instantly transfer them to any other address on the blockchain without depending on authorizations, permissions, or limits.

Your public address and your private key are the only pieces of information you need to hold and manage your funds from anywhere in the world.

What is a wallet?

Your funds are not stored “in” your wallet. It just gives you access to your funds and NFTs stored on the blockchain. Your wallet can be thought of as a window to your funds.

This wallet is a free, open-source, client-side interface. This wallet allows you to interact directly with the blockchain, while you remain in full control of your keys and funds.

Please think about the following carefully...

YOU are the one who is in control of your wallet. This wallet is not a bank or exchange. It does NOT hold your keys, your funds, your NFTs, or your information. This means we cannot access accounts, recover keys, reset passwords, or reverse transactions.

WARNING: You and Only You are Responsible for Your Security. We cannot access your wallet your funds or NFTs. PERIOD!

Where are my funds stored?

Your tokens, coins, cryptocurrency, and NFTs are not in your wallet. Just like they are not in a hardware wallet or on blockchain explorers. All digital assets are on the blockchain itself. This means that we do not control or have access to them. Your wallet is a doorway that allows you to interact with the blockchain in a convenient way.

WARNING: We Do Not Control Your Funds or NFTs. You Do!

What is Blockchain?

The term “blockchain” refers to a public, decentralized spreadsheet, similar to a ledger. It is maintained by people all over the world, who remotely manage transactions to make them a part of the blockchain, permanently.

When you use a wallet, you are accessing the blockchain directly. It is your responsibility to take all necessary security precautions when you do this. Please do your research. Knowledge is power!

No keys. No Password. No funds! No NFTs!

What if I lose my keys or password?

We cannot recover your information for you. If you lose your key, it is GONE FOREVER. We do not store any data. After you have received your keys and set up a password, we strongly suggest you:

Write Your Keys and Password Down on piece of paper and put it in a safe place (“cold storage”).

Do Not Store Your Keys and Password on Your Computer or Phone as your device being hacked or lost will result in the loss of access to your cryptocurrency and NFTs – forever!

Warning: We Cannot Restore Your Keys or Reset Your Password

NO KEYS. NO PASSWORD; NO FUNDS!

About Security

Some helpful tips

Never give your Private Key to anyone; that includes your keystore file (JSON) and mnemonic phrase.

You only provide others with your wallet address.

Do not trust any free ScienceCoins (SCI) or NFTs.

If someone is giving away free SCI or NFTs, it is probably not real.

If they email you saying they are us, it is not real. If they ask for your private key, it is especially not real. WE WILL NEVER ASK YOU FOR YOUR KEYS! NEVER!

Bookmark our website.

Always check the URL for our “Therapoid” certification.

Store your keys in secure place.

What is the upside?

All this sounds hard because it is a different way of thinking. For the first time, you are 100% in control of your funds and blockchain-associated assets.

Congratulations!

Thanks for reading through our introduction! Now you ready to start gaining ScienceCoins (SCI) and NFTs. If you want to know more, please go to our [Frequently Asked Questions \(FAQ\)](#). We are here to help you have the most secure and most convenient experience possible.

Feel free to contact us if you need more information.
